

MINING TO MICRONS

SAVINO MICRON (INDIA) PVT. LTD.

Manufacturer of Micronised Minerals

ABOUT US

Savino Micron (India) Pvt Ltd. is a manufacturer and distributor of micronized CaCO_3 powder (GCC) (Uncoated and Coated with Stearic Acid.) Established in 2010 by a group of industrialists and entrepreneurs with huge experience in the field of minerals and manufacturing. Savino[®] Micron aims at providing complete solutions for natural minerals from 'Mining to Microns'. The management team on board is proof enough of our capabilities, with regards to specialized production facilities, professional management and a sound commercial network. The daily production capacity is in excess of 100 tons, which amounts to more than 35,000 tons annually.

STATE - OF - THE ART MACHINERY

We own modern processing technology including German technology Classifier and Malvern Mastersizer (United Kingdom), quality-driven procedures and centralized control system integrated with experienced specialists and efficient management.

MINING ARM - SAVINO MINING & MINERALS

In order to maintain smooth supply with uniform quality of the highest standard, we have established our own mining concern - **Savino Mining and Minerals** with our own mines in Rajasthan which has calcite deposits with high whiteness and brightness and very high CaCO_3 content. We also have tie ups for supply of super premium grade calcite from Malaysia, Vietnam and Turkey for catering to clients with special premium quality requirement.

TOTAL QUALITY MANAGEMENT

Quality control process is strictly ensured from selecting incoming material to checking out-going finished products by the most modern testing equipments in the world. We aspire to the highest standard of quality control and management in order to provide the best quality products to our clients with uniform quality and consistency. Our business is in accordance with the best international quality management practices.

We commit to supply the best products to customers in domestic and worldwide markets.

Conversion Metric

Mesh Size	Micro Size (H)	Typical Material
325	44	Silt
400	37	Plant pollen
750	20	-
1250	12	Red blood cell
3000	5	-
4800	2	Cigarette Smoke

MAJOR APPLICATIONS

Paint

Rubber

Paper

Masterbatches

Footwear

PVC Pipes
